

LogNet Data Offering Changes

Effective September 11, 2026, LogNet will transition its data offerings to focus exclusively on USA well log digital and image formats. As part of this shift, we will no longer provide the following data types:

- Directional Surveys (Text and PDF Formats)
- Checkshot Surveys
- Pressure Data (Classes A, B, and C)
- Core Data (Analysis, Description, and Headers)
- Formation Tops (with Two-Way Travel Times)

New delivery method:

- Directional Surveys are delivered by EnerDeq.
- Pressure data, Checkshots, Core, and Formation Tops are all part of the International E&P dataset, delivered via EDIN/Snowflake/REST API. These datasets are available as a part of the international upstream CSM+ subscription.

Moving forward, LogNet will focus its resources on providing Rasters, Depth-registered Rasters, and Digital (Composite LAS) files for USA.

We are committed to supporting you through this transition and ensuring your data needs continue to be met. If you have questions, please email support.energy@spglobal.com or click [here](#).
